

hmap::Function

```
graph BT; A[hmap::CraterFunction] --> B[hmap::Function]
```

The diagram illustrates a relationship between two function types. At the bottom is a gray box labeled 'hmap::CraterFunction'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'hmap::Function'. This indicates that 'hmap::CraterFunction' inherits from or is a specialization of 'hmap::Function'.
